

Investment Mandate

The mandate of the Satrix SA Bond Satrix ETF is to track, as closely as possible, the value of the S&P South Africa Sovereign Bond 1+ Year Index. The Satrix SA Bond ETF is an index tracking fund, registered as a Collective Investment Scheme, and is also listed on the Johannesburg Stock Exchange as an Exchange Traded Fund. The Satrix SA Bond ETF provides investors with South Africa Government Bond exposure as an asset class. In accordance with the investment policy of the Satrix SA Bond, all income received from instruments comprising the index, net of cost is re-invested on behalf of investors through the purchase of instruments comprising the S&P South Africa Sovereign Bond 1+ Year Index in line with total return index methodology, thereby increasing the net asset value of each Satrix SA Bond security. In order to reduce costs and minimise tracking error, the Satrix SA Bond may engage in scrip lending activities.

Index Specifics

The S&P South Africa Sovereign Bond 1+ Year Index is a market-value-weighted index which aims to track the performance of South African rand denominated sovereign debt publicly issued by the South Africa government for the domestic market, with maturities of one year or more.

Risk Profile (Moderate)

This is a moderate-risk portfolio that aims to deliver income with low risk of capital loss. This portfolio is designed to track the benchmark and is a pure bond fund. This portfolio has a medium to long-term investment horizon.

Risk associated with this product will be the default risk, interest rate risk, inflation risk, economic and political risk.

Additional Information

All reasonable steps have been taken to ensure the information on this information sheet is accurate and complete. The information does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk.

Satrix Managers (RF) (Pty) Ltd (Satrix) is an authorised Financial Services Provider (FSP No. 15658) and a registered and approved manager of Collective Investment Schemes (CIS) in terms of the Collective Investment Schemes Control Act, 45 of 2002. Satrix is the manager of the Satrix Unit Trust Scheme and the Satrix Collective Investment Scheme in securities. The Satrix Collective Investment Scheme in securities (SATRIX securities), while registered as CIS, are listed on the JSE Limited, trade at JSE ruling prices via any stockbroker or trading platform, and will incur trading and settlement costs. The price at which participatory interest trades on an exchange may differ from the price at which the manager repurchases participatory interests. Any pricing included in this document is indicative and is not binding as such on SATRIX. As with all stock exchange investments, the market price of SATRIX securities will fluctuate according to market conditions, general sentiment and other factors. Past performance is not necessarily a guide to future performance nor does the Manager provide any guarantee with respect to the capital invested, nor the return of a portfolio. Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. Additional information regarding the Satrix product portfolio's, brochures, application forms, schedule of fees, charges and commissions, annual and quarterly reports, can be obtained from the Manager. Should the user of this document seek financial, tax, legal, and/or accounting advice, the user should obtain his/her independent advice.

Glossary Terms

Market cap weighted index - A market cap weighted index is created by giving weightings to shares according to the company's size (or capitalisation). The larger the company's market capitalisation, the larger it's weighting in the index.

Market capitalisation (or market cap) - Market capitalisation (or market cap) is the total value of the issued shares of a publicly traded company; it is calculated by multiplying the current share price by the number of shares outstanding. This value is an indication of a company's size (or capitalisation).

Passive investment - Passive investment is a style of investing where a fund replicates the performance a particular market index. Passive investment vehicles include Exchange Traded Funds (ETF's) and index tracking unit trusts. They are so called because the portfolio manager doesn't choose the underlying portfolio. They simply replicate the index they have chosen to track.

Total Expense Ratio (TER) - This is the total costs associated with managing and operating an investment (excluding administration, financial planning and servicing fees). These costs consist primarily of management fees and additional expenses such as auditor fees, legal fees and other expenses. The total cost of the fund is divided by the fund's total assets under management to arrive at a percentage amount on a monthly basis. The annual average of these monthly values represents the TER.

Volatility - Volatility is a measure of 'risk', and refers to the extent to which the price of an investment or fund fluctuates over a certain period of time. Funds with a high volatility usually offer the potential for higher returns over the longer term than low volatility funds but also the potential for significant downside.

Basket - A portfolio of securities comprising all the component securities of the relevant index in the same weighting as they are held on that index.

Constituent - A constituent is a stock which is part of a larger portfolio

Central Securities Depository Participant (CSDP) - Institution established to hold securities and to affect transfer under section 32 of the Securities Services Act, No 36 of 2004 between accounts, typically by book-entry.

Distribution - Accrued income less portfolio expenses, which is distributed to investors

Liquidity - Liquidity is the ease of buying and selling a financial instrument for cash without causing any significant change in its price.

Market makers - The market makers will attempt to maintain a high degree of liquidity through continuously offering to buy and sell participatory interests at prices around the NAV, thereby ensuring tight buy and sell spreads

Net Asset Value (NAV) - The NAV is the total assets of the portfolio less the liabilities. The NAV is given per ETF share that is outstanding by dividing the total value of the fund by the number of securities that are issued.

Rebalancing - Rebalancing is when the asset manager buys and/or sells constituents in a portfolio in order to bring the portfolio in line with the index being tracked.

Scrip lending - The lending of securities from one party (being the holder of the securities) to another party (the borrower). The borrower provides collateral for the securities borrowed.

Securities - An instrument representing ownership (stocks), a debt agreement (bonds) or the rights to ownership (derivatives).

Spread - The difference between the price at which a market maker is willing to buy a security and the price at which the seller is willing to sell it (the difference between the bid and ask for a given security).

Stockbrokers - A stockbroker can execute your purchase or sale order through the JSE's trading system (stockbrokers need to be registered members of the JSE). As with any share transaction, your broker will attempt to find a sell order for your securities in the market that match against your buy order.

Strate - The electronic settlement system utilised by the JSE and administered by Strate, which facilitates the electronic clearing and settlement for all transactions concluded on the JSE.

Exchange Traded Funds (ETF) vs Unit Trust - In both ETF's and Unit Trusts the investor essentially owns a "proportionate share" (in proportion to the participatory interest held in the fund/portfolio) of the underlying investments held by the fund. With Unit Trusts, the investor holds participatory units issued by the fund while in the case of an ETF, the participatory interest, while issued by the fund, comprises a listed security or share and traded on a Johannesburg stock exchange. ETF shares can be traded by any stockbroker on the exchange or via an administration platform.

Tax Free Investing - This ETF qualifies as a tax free investment according to section 12T of the Income Tax Act, with effect from 1 March 2015. South African individuals qualify for the associated tax benefits namely no tax on dividends, income or capital gains whilst still enjoying all the benefits of an ETF. Note contributions to tax free investments are limited to R36 000 per tax year, with a lifetime limit of R500 000. Amounts invested in excess of these permissible thresholds are subject to tax penalties.
