

INVESTMENT POLICY SUMMARY

This is a pure equity fund which tracks the performance of the FTSE/JSE Equally Weighted Top 40 index. The appeal for an investor is the alternate weighting methodology to the traditional FTSE/JSE Top 40, which is a market cap weighted index. We believe that the benchmark choice and resulting returns form the most important elements of an equity strategy - by investing in a passive vehicle the returns to investment strategies are known. By applying a full replication strategy, the fund will mirror the composition of the chosen benchmark. We believe that the benchmark choice and resulting returns form the most important elements of an equity strategy - by investing in a passive vehicle the returns to investment strategies are known. By applying a full replication strategy, the fund will mirror the composition of the chosen benchmark. This fund is rebalanced quarterly.

WHY CHOOSE THIS FUND?

- This fund is ideal for the investor who seeks general equity market performance through a well-diversified equity portfolio at low costs.
- The FTSE/JSE Top 40 Equally Weighted Index represents the 40 largest, most liquid shares listed on the JSE.
- The equal weighting methodology offers a more balanced exposure to all companies.
- This is a passive, 100% equity investment with no stock picking or asset allocation calls.
- This fund could also serve as the core component of the equity portion of a client's portfolio.

PERFORMANCE (ANNUALISED)

Retail Class	Fund (%)	Benchmark (%)
1 year	0.78	1.30
3 year	10.29	11.07
5 year	9.95	10.85
10 year	5.45	6.37

Annualized return is the weighted average compound growth rate over the period measured.

ACTUAL HIGHEST AND LOWEST ANNUAL RETURNS*

Highest Annual %	38.28
Lowest Annual %	(13.41)

FEES (INCL. VAT)

	Retail Class (%)
Advice initial fee (max.)	N/A
Manager initial fee	N/A
Advice annual fee (max.)	1.15
Manager annual fee	0.52
Total Expense Ratio (TER)	0.59
Transaction Cost (TC)	0.18

Advice fee | Any advice fee is negotiable between the client and their financial advisor. An annual advice fee negotiated is paid via a repurchase of units from the investor. The portfolio manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. This fund is also available via certain LISPS (Linked Investment Service Providers), which levy their own fees.

Total Expense Ratio (TER) | The TER is the charges incurred by the portfolio, for the payment of services rendered in the administration of the CIS. The TER is expressed as a percentage of the daily NAV of the CIS and calculated over a period of 3 years. The TER is calculated from 01 April 2021 to 31 March 2024. A higher TER does not imply a poor return nor does a low TER imply a good return.

The Transaction Cost (TC) is the cost incurred by the portfolio in the buying and selling of underlying assets. This is expressed as a percentage of the daily NAV of the CIS and calculated over a period of 3 years. Obtain the costs of an investment prior to investing by using the EAC calculator provided at www.satrix.co.za

ASSET ALLOCATION

PORTFOLIO QUARTERLY COMMENTARY - 31 MAR 2024

Offshore equity markets started the year strong as optimism surrounding Artificial Intelligence (AI) and strong economic growth prospects continued, allowing central banks to keep their interest rate-cutting plans in play. Annual inflation in the US edged up 3.2% in February while unemployment ticked up to 3.9% from 3.7%. China set an ambitious 5% growth target for the year, while it vowed to transform its development model and lower risks associated with its property sector being bankrupt.

In rand terms, the first quarter of the year saw the MSCI World Index up 12.7%, the MSCI Emerging Markets Index up 6%, and the MSCI USA Index up 14.2%. The MSCI India Index was up 9.8% during the quarter, while the MSCI China Index rose 1.3%. The MSCI Europe Index was up 9% while the MSCI United Kingdom Index rose 6.8%.

During their March meeting, the US Federal Reserve (Fed) left rates unchanged for the fifth time in a row, since pausing last year. Oil prices spiked during the quarter with oil producers like Russia and members of OPEC cutting production to tighten the supply-demand in the market. Brent oil ended the quarter at US\$86.97 a barrel, a 12.9% increase from the start of the quarter. The gold price ended the quarter up 8.5%, hitting a record high of US\$2 238. The US 20-year Government Bond yield ticked up to 4.46% at the end of the quarter.

The story was different in local markets, as the FTSE/JSE All Share Index (ALSI) was down 2.2% for the first quarter and the FTSE/JSE Top 40 Index (Top 40) was down 2.3%. The underperformance was largely driven by local Financials being down 7.1% for the quarter with Resources and Industrials up 0.6% and 0.7% respectively. The South African 10-year Government Bond yield closed the quarter at 10.9%, while the All Bond Index (ALBI) was down 1.8%. The cash benchmark, the Alexander Forbes Short-Term Fixed-Interest (STeFI) Composite Index, delivered positive money market returns of 2%, while the FTSE/JSE SA Listed Property Index (SAPY) was up 3.8% for the quarter.

South Africa heads to the polls in May this year, and the elections might prove to be the most contested since 1994. The markets will be watching how the exchange is impacted with the potential coalition permutations that may be spun out of the election results. The markets are also keeping a close eye on the South African Reserve Bank (SARB)'s policy on rate cutting anticipated for this year. At their last meeting, the SARB kept rates unchanged, though it cited some inflation risks as it moved closer to the top of the central banks' 3-6% inflation target range, printing 5.6% in February. During the quarter, the rand depreciated by 3.5% to the US dollar, closing at R18.94 to the dollar, R23.92 to the pound and at R20.45 to the euro.

Portfolio Performance and Changes

In the first quarter of 2024, the FTSE/JSE Equally Weighted Top 40 Index (ETOP40) had a negative return of 3.77%, significantly underperforming the FTSE/JSE Top 40 Index (TOP40), which contracted 2.27%.

A significant number of stocks were in deep negative territory. Resources continue to drive the index performance down with some of the largest negative performances coming from this sector. Sasol (SOL) (-19.8%), Anglo American Platinum (AMS) (-19.3%), Impala Platinum (IMP) (-14.2%) and Northam Platinum (NPH) (-18.8%) all detracted from performance for the quarter.

Financials did not fare any better with large banks including FirstRand (FSR) (-13.2%) and Standard Bank (-11%) taking a negative turn. Other financial services companies including Remgro (REM) (-24.8%) and Discovery (-16%) had a difficult quarter. Retailers' business confidence dipped during the first quarter of 2024, emphasising the effect high borrowing costs continue to have on consumers. Woolworths (WHL) (-16%) and Shoprite (SHP) (-9%) consequently had a tough quarter.

On the positive side, with the run on gold in the last month of the quarter, gold companies including Harmony Gold (HAR) (+31.1%), AngloGold Ashanti (ANG) (+20.6%) and Gold Fields (GFI) (+11%) contributed positively to the index performance.

Richemont (CFR) (+12.4%) reported a sharp uptick in its revenues in the final three months of 2023, driven by surging jewellery sales in China and Japan, which offset a drop in sales in Europe, giving the share price significant momentum over the quarter. BID Corporation (BID) (+9.5%) and British American Tobacco (BTI) (+9.2%) also contributed positively to performance in the quarter.

At the March 2024 FTSE/JSE index review the FTSE/JSE implemented the first phase of its Index Harmonisation project, which was the alignment of the All Share weightings to SWIX weightings. The project will ultimately collapse the JSE's vanilla and SWIX indices into one set of benchmark indices, significantly simplifying the current benchmark complexity and overlap, and centralising liquidity. There were no additions to or deletions from the index. The one-way turnover was 4.20% driven by the implementation of the first phase of the Index Harmonisation project.

RISK PROFILE (AGGRESSIVE)

This is an aggressively managed, high-risk portfolio that aims to deliver capital growth over the long term (greater than 5 years). It is designed to track the benchmark and is a pure equity fund. There may be some capital volatility in the short term, although higher returns may be expected from five years or beyond.

Trustee

Standard Chartered Bank, Tel No.: 011 217 6600, E-mail: southafrica.securities-services@sc.com

DISCLAIMER

Although all reasonable steps have been taken to ensure the information on this website/advertisement/brochure is accurate. The information to follow does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision.

*The highest and lowest annualised performance numbers are based on 10 non-overlapping one year periods or the number of non-overlapping one year periods from inception where performance history does not yet exist for 10 years.

The Sanlam Group is a full member of the Association for Savings and Investment SA. Collective investment schemes are generally medium- to long-term investments. Please note that past performances are not necessarily a guide to future performances, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Satrix Managers (RF) (Pty) Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, and the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign instruments which could be accompanied by additional risks as well as potential limitations on the availability of market information. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates. The portfolio management of all the portfolios is outsourced to financial services providers authorized in terms of the Financial Advisory and Intermediary Services Act, 2002. Standard Chartered Bank is the appointed trustee of the Satrix Managers Scheme.
